Project Overview

A mobile system that helps students capture notes by scanning materials. Turns scanned content into organized digital notes. Built to make studying and review simpler and more effective.

Learning Objectives

At the end of this activity, students should be able to:

- Identify real-world problems that can be solved using technology.
 - Apply creativity and critical thinking in designing solutions.
 - Develop a basic system concept and its features.
 - Present and communicate technological ideas effectively.
 - Demonstrate collaboration and teamwork.
-

Project Theme

"Simplifying Learning Through Digital Innovation"

Create a system, program, application, website, or device that addresses a problem faced by:

- Students
 - Teachers
 - Schools
 - Businesses
 - Communities
 - Government Offices
 - Healthcare Facilities
 - Environmental Organizations
-

Project Mechanics

Phase 1: Design Your Idea

As a group, discuss and identify a problem that needs a solution.

Create a visual representation of your proposed system using any of the following:

- Hand-drawn sketch
- Microsoft PowerPoint
- Canva
- Figma
- Draw.io
- Any design tool of your choice

Your design should clearly show:

- System Name
- Purpose of the System
- Target Users
- Main Features
- Sample Screens or Interface Sketches

Phase 2: Build Your Idea

Develop a prototype or demonstration of your proposed solution.

The prototype may be:

- A PowerPoint simulation
- A clickable design prototype
- A simple website
- A working program (optional)

The focus is on demonstrating how the system will work.

Phase 3: Innovate and Present

Prepare a presentation explaining your project.

Discuss:

1. The problem being addressed.
2. Why the problem is important.
3. Your proposed solution.
4. Features of the system.
5. Benefits to users.
6. Expected impact on the community.

Submission Requirements

Submit one PDF document containing the following:

1. Project Title
2. Group Members
3. Problem Statement
4. Proposed Solution
5. System Features
6. Expected Benefits and Impact
7. Screenshots, sketches, mockups, interface designs, or prototype images of the proposed system/device

Submission Instructions:

- Compile all required content into a single Word document.
- Export/Save the document as PDF.
- Upload the PDF file and any supporting project files to your group's GitHub repository.
- Submit the GitHub repository link through the Google Form provided by the instructor.
- Be prepared to explain your project face-to-face with the instructor during the scheduled presentation or consultation so **prepare your presentation ppt.**
