

Module 5 Wrap-Up Activity

Information Detective Challenge

Course:

Introduction to Computing / IT Fundamentals

Module:

Module 5 – Information Literacy: Searching, Accessing, and Evaluating Information

Student Name:

DE GUZMAN, JOHN CHRISTIAN P.

Section:

BSIT1-S10

Date:

AUGUST 8, 2026

Learning Objective

Apply effective search strategies and evaluate the reliability of online information using the CABC Test (Credibility, Accuracy, Bias, and Currency).

Instructions

For this activity, you will act as an **Information Detective**. Your task is to search for information on a chosen topic, evaluate the reliability of an online source, identify its source type, and determine whether it is appropriate for academic use.

Choose **ONE** topic from the list below:

- Artificial Intelligence in Education
- ☐ Cybersecurity for Students
- ☐ Social Media and Mental Health
- ☐ Cloud Computing

- ☐ Digital Citizenship

Artificial Intelligence in Education

Part 1 – Smart Searching

Write the search query you would use to find information about your chosen topic.

Example: > cybersecurity threats in schools

Your Search Query:

Artificial Intelligence in Education: benefits, challenges, and impact on students and teacher.

Part 2 – Source Selection

Find **ONE website** related to your chosen topic and provide the following information.

Website Title:

Artificial Intelligence in Education - UNESCO

Website URL:

<https://www.unesco.org/en>

https://www.unesco.org/en/digital-education/artificial-intelligence?utm_source

Part 3 – Apply the CABC Test

Evaluate your chosen website using the CABC Test.

C – Credibility

Who wrote or published the information?

The information is published by UNESCO (United Nations Educational, Scientific and Cultural Organization), a specialized agency of the United Nations that focuses on education, science, and culture. This makes the website a credible and authoritative source for information about AI in education.

A – Accuracy

What evidence, facts, statistics, references, or supporting information are provided?

The UNESCO website provides supporting information from research, policy guidance, reports, and AI competency frameworks. It refers to the Beijing Consensus on AI and Education, UNESCO's guidance for policymakers, and competency frameworks for students and teachers. It also discusses both the benefits and risks of AI in education, such as personalized tutoring, smarter lesson planning, over-reliance, and ethical concerns.

B – Bias

Is the website trying to persuade, promote, advertise, or sell something? Explain your answer.

The website is not mainly trying to sell or advertise a product. It is published by UNESCO to provide information and guidance about the opportunities and risks of AI in education. However, UNESCO does have a positive view of using AI responsibly in education, while emphasizing inclusion, equity, and a human-centered approach.

C – Currency

When was the information published or last updated?

The UNESCO webpage is current and regularly updated. The page currently includes information and publications from 2026, including a publication dated July 3, 2026, showing that the information is being maintained and updated.

Part 4 – Source Type

Identify the type of source.

- ☐ Scholarly Source
- ☒ Professional Source
- ☐ Public Source

Explain why you selected this source type:

I selected Professional Source because the website is published by UNESCO, an international organization specializing in education, science, culture, and information. The website provides professional guidance, research-based information, and policy recommendations about Artificial Intelligence in Education.

Part 5 – Final Decision

Would you use this source for a school assignment?

- Yes
- ☐ No

Justify your answer using the CABC Test.

I would use the UNESCO website for my school assignment because it is a credible, accurate, balanced, and current source. It is published by UNESCO, provides research and facts about AI in education, discusses both its benefits and risks, and includes recent information. Therefore, it is a reliable source for my topic.

Reflection Question

What is the most important thing you learned about searching for and evaluating online information?

The most important thing I learned is that I should check if a website is credible, accurate, unbiased, and up-to-date before using its information. This helps me make sure my sources are reliable and appropriate for school assignments

Submission Requirements

Submit a PDF copy of your completed activity through GITHUB Make sure that the link is directed to your activity and not just an empty repository. Submit your links thru the google form that is provided in your respective google classroom.

Reminder:

Before using any information from the internet for school work, always apply the **CABC Test**:

- **C** – Credibility

- **A** – Accuracy
- **B** – Bias
- **C** – Currency

Being information literate means not only finding information, but also ensuring that the information is reliable and appropriate for academic use.
